*Please continue to communicate and work with our staff on long-term pricing projections.*

There are a number of factors contributing to both current and the recently announced increases heading into 2016 including an overall healthy North American “building” environment as well as pressures related to duty and exchange felt on products produced and shipped from the USA or used within the Canadian manufacturing process.

On behalf of Shoemaker Drywall Supplies I would like to reassure our clients that we are committed to your business and the local landscape. We will monitor and communicate the status of these increases on a continual basis moving forward.

Respectively,

Greg Holunga, C.I.M.
