

Price Increase Notice

Dear Valued Customer,

ICP Building Solutions Group has been monitoring costs of raw materials and logistics, and the trendlines indicate continuing escalations. While we have worked diligently to hold our pricing, we are no longer able to absorb these increases.

On April 2, 2021, ICP will implement a price increase, affecting our HandiFoam product line and related accessories by approximately 6% to 20%. We will be distributing updated price pages over the next several days. This price list will also provide you with pricing for our new low GWP, compliant HandiFoam E84 product line.

Our goal is to continue to diligently negotiate costs with our suppliers to minimize any future pricing impact to you, our loyal customers.

On behalf of the entire ICP Building Solutions Group team, we thank you for your business and appreciate your support.

Sincerely,

Carl Knight
VP Pricing
